

## freeVoice Tube – the elegant mini! Headset with multipoint and CVC technology

The new Bluetooth headset FreeVoice Tube FBT250 is as flexible as you are. You get a crystal clear reception, even up to 10 metres from a telephone. Thanks to the ultralight design, you will hardly notice the Bluetooth freeVoice Tube headset, even if worn for longer periods.

The silicon ear pieces and the ear clip adjust automatically to your wears to further improve the acoustic understanding.

### Multipoint-Bluetooth

The headset can be connected to two phones simultaneously and you can toggle between both phones.

### Automatic standby after 8 minutes

The Tube switches itself off automatically after 8 minutes to save power and improve the operating period. Incoming calls can still be accepted at the press of a button on the headset.

### Bluetooth V 4.1 with CVC echo and noise cancelling

The integrated Clear Voice Capture (CVC) technology allows an optimum voice quality as well as high-quality music transmission thanks to A2DP. Troublesome background noise is filtered out with no compromises in the natural sound of voices. The headset is perfect for use in both a loud and quiet environment. Thanks to the clear voice transmission, there are fewer misunderstandings and repeated questions, which ultimately leads to more efficiency.

Fastening to air vent.

## Features and advantages

Features	Advantage
Class 2 Bluetooth technology, version: CSR 4.1	Take and end calls directly and comfortably from the headset*, control practical functions such as mute and volume. This saves time and increases productivity.
Noise-cancelling microphone	The integrated Clear Voice Capture (CVC) technology allows an optimum voice quality. Troublesome background noise is filtered out with no compromises in the natural sound of voices.
